

REAL-TIME ANALYTICS MANAGES YOUR BUSINESS

INFORMATION YOU NEED NOW

AI-BASED FEATURES INCLUDED

Non-Stop Data Collection, Analysis

Advantage GPS by Procon Analytics provides vehicle finance companies with the most-advanced GPS tracking and risk mitigation products and services. Our interactive dashboard arms customers with powerful risk assessment data providing actionable intelligence to mitigate losses, protect and locate collateral, and make financing decisions now, and in the future.

Our seasoned automotive, finance, and telematics professionals with decades of experience have brought innovation, energy, and a fresh perspective to an industry that demands world-class technology and innovation.

Advantage in the Marketplace.

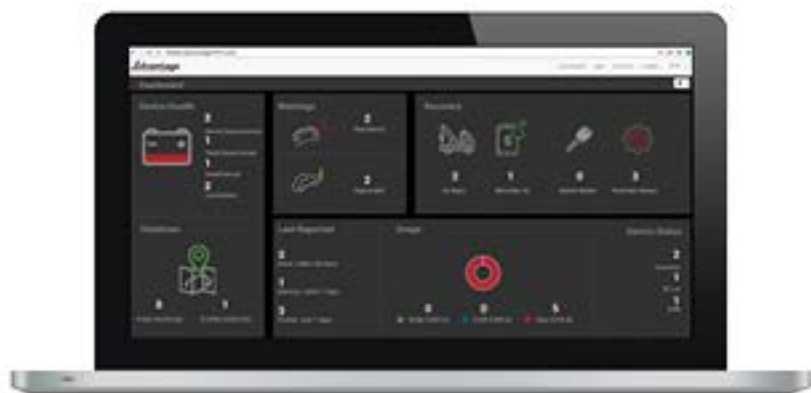

Advantage GPS services more than 1,000 dealers and automotive finance companies, and nearly 1 million connections and growing.

Personalized Service – 24/7 Support – Car People

Nothing Artificial About This Intelligence

Constant data streams from our in-vehicle hardware is sent directly to Advantage's fully interactive dashboard where our system uses artificial intelligence (AI) to monitor, categorize, analyze and assist you in managing and mitigating your risks. Our system never stops assessing data, so it is constantly being self-upgraded.

Interactive Dashboard

- Customized Alerts and Warnings
- Automated Impound Lot Notifications
- Vehicle Recovery Made Effortless
- Advanced Reporting Metrics
- Monitors for Excess Usage
- Bad Install/Tamper Notifications
- Progressive **4G** LITE Technology

Recovery Management

Just two mouse clicks and you have a recovery specialist assigned to recover your vehicle. We've partnered with the American Recovery Association, so you can rest assured your agent is a certified recovery specialist.

With a Glance at Your Dashboard You Know

- What's Scheduled for Repo
- Vehicles with starter disable set
- Vehicles with payment reminders on
- Vehicles with potential tamper alerts
- Real-time locates and location prediction

Industry Leading Hardware

We have two hardware solutions – EVO and REVO – each provides live heartbeats of every vehicle in your portfolio and transmits location position and actionable intelligence all over a 4G LTE network (an industry first) and will do so into the foreseeable future.

REVO is the industry's REVO-lutionary wireless GPS tracking device that can be activated and placed nearly anywhere in a vehicle.
