INSTANT REAL-TIME VEHICLE LOCATION

Our all-new, AI-powered Smart Location feature automatically provides you with a vehicle's real-time logistics.

Smart Location Technology

Past and
Current Location

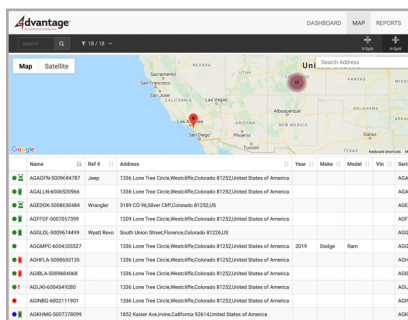

Vehicle
Movement

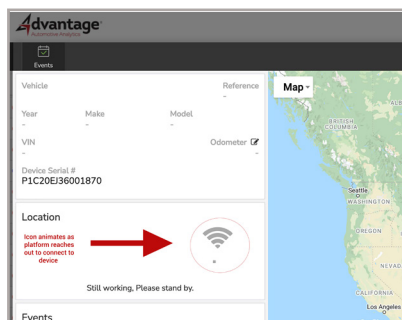

Device
Connectivity

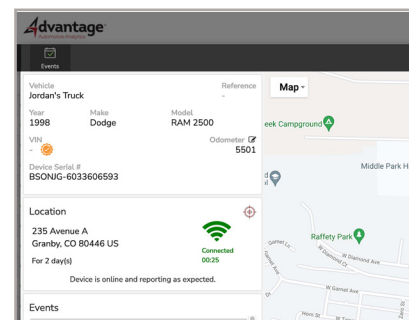

How It Works

- Click on any vehicle asset

- Advantage platform searches for device (could take up to :60)

- Once connection is established, the platform provides location address, time, if vehicle is moving, etc.
- If connection cannot be made, the platform will provide last time reported, location and possible issues to trouble-shoot.
